📍 Dubai, UAE

CAREER SUMMARY

- Experienced Systems Engineer with over 11 Years of solid background in Linux, Kubernetes and VMware with focus on designing, implementing, and optimizing software delivery using CI/CD pipelines. Proficient in deploying and managing cloud and on-premise infrastructure, with expertise in monitoring and troubleshooting complex environments to enhance system stability and performance.

EXPERIENCE

DevOps/WinOps Engineer

Deriv

📅 Oct 2023 – Ongoing

📍 Dubai, UAE

- Sustain a multi-cloud OS-independent infrastructure with scalability and security as focal points, catering to latency-sensitive trading workflows. (AWS/Azure)
- Responsible for incident response, troubleshooting, and resolution and for leading the post-incident root cause
- Automate repetitive tasks by utilizing scripting languages (Python, PowerShell, and Bash)
- Implement and manage the infrastructure as code using tools like Terraform and CloudFormation, and CI/CD pipelines with GitHub Actions and Octopus Deploy for faster deployments.

System Administrator Specialist

FIS

📅 Dec 2021 – Oct 2023

📍 Chennai, India

- Designing comprehensive self-service and self-healing workflows initiated from an IT Service Management (ITSM) tool like ServiceNow, primarily leveraging scripting languages such as PowerShell/Bash.
- Engaged in managing VMware and Nutanix infrastructure, actively seeking avenues to streamline daily operations through automation.
- Decreased manual workload for the operations team by up to 30% through automation of routine tasks.

Lead Systems Engineer

Fidelity Investments

📅 Mar 2016 – Dec 2021

📍 Chennai, India

- The main responsibility involves overseeing and troubleshooting the VMware infrastructure, which comprises over 10,000 servers of different flavors and hardware types.
- Manage incidents, implement changes, and address requests for both the VMware platform and the Windows operating system.
- Responsible for creating and maintaining Grafana dashboards to effectively monitor the performance of multiple vCenters.
- Lead efforts for large scale migration of EOL applications to newer platforms.
- Deploy updates to the VMware platform to maintain its stability and security.

Senior Analyst

HCL Technologies

📅 Mar 2013 – Mar 2016
